

# CS 215 - Assignment 1

## Documentation

The webpages is uploaded on hercules and can be accessed by the url [http://www2.cs.uregina.ca/~caoba200/Assignment1/tiles\\_homepage.html](http://www2.cs.uregina.ca/~caoba200/Assignment1/tiles_homepage.html) or by my personal website <http://www2.cs.uregina.ca/~caoba200/> (There is a section named CS 215 Assignments which contains a link to tiles\_homepage.html)

### Tiles Micro-blogging Site Structure:

- **tiles\_homepage.html**

When user accesses the webpage by url, tiles\_homepage.html will be loaded. This is the default page for the site. The page's structure followed the description of the assignment. By default, when user click on the logo (applied for every pages), it will lead user back to this page.

When user click on a profile image or user link (in the form of @username), a user detail page will be loaded (for now, only tiles\_userinfo.html is loaded).

When user click the button POST, tiles\_postrepost.html will be loaded.

When user click the button LOG OUT or LOG IN, tiles\_loginpage.html is loaded.

- **tiles\_loginpage.html**

Allow user enter user name and password to login (for now, the LOGIN button will lead user directly to the default page.)

There is an option for sign up (below the LOG IN button) which will load tiles\_signuppage.html.

- **tiles\_signuppage.html**

Collect user's information in order to create a new account. For now, when user click SIGN UP button, user is directed to the login page.

- **tiles\_postrepostform.html**

Allow user to create a new post or repost someone's post. When user click the POST button, user will be directed to the default page.

- **tiles\_userinfo.html**

Show user's detail information and his posts/reposts list.
